Art Unit: 3617

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3, and 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nitta et al in view of Inman, Sr. et al. Nitta et al disclose the basic claimed structure including a water muffler 35, a cylinder head, an air passage (such as 57). Not disclosed by Nitta et al is a valve. Inman, Sr. et al teach a valve 25 in an air passage of an exhaust system. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the air passage (exhaust system) of Nitta et al with a valve as taught by Inman, Sr. et al for reduced sound.

3. Claims 2, 4, and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Katayama et al disclose a valve.
